## DEMO VIDEO SCRIPT TEMPLATE

### Prompt 4

you are a talented video film maker, please generate a script for a Hackathon Solution Demo

ChatGPT said:

Absolutely! Here's a professional-grade **Hackathon Solution Demo Video Script**, tailored for a 2–3 minute presentation — short enough to keep judges' attention, and structured to clearly show value, story, and functionality.

---

## HACKATHON SOLUTION DEMO VIDEO SCRIPT

 **Length:** ~2–3 minutes

 **Voiceover/Narration:** Can be delivered live, recorded, or added as subtitles

 **Visuals:** Live demo, screen recordings, app interface, team footage (optional)

---

### [Intro - 0:00–0:15]

**Visual:** Logo, Team name, Short animation or fade-in of UI

**Voiceover:**

"Hi, we're [Team Name], and this is [Project Name] – [short tagline, e.g., "the fastest way to track freelance invoices"]".

In the next 2 minutes, we'll show you how we solved a real-world problem in just [X] hours."

---

### [Problem Statement - 0:15–0:35]

**Visual:** Persona illustrations, simple animation, or text overlays

**Voiceover:**

"Every [user type] struggles with [describe the problem briefly].

We learned that [quick insight/statistic/quote].

It wastes time, causes frustration, and hasn't been solved well... until now."

---

# Alfonso Govea

---

## 💡 [Solution Overview - 0:35–0:55]

**Visual:** App homepage or dashboard UI, animated walkthrough

**Voiceover:**

"We built [**Project Name**], a [web/mobile/AI-powered/etc.] tool that helps [target user] do [key function] quickly and intuitively.

It's designed to be [e.g., easy to use, smart, efficient, mobile-first, etc.], with zero setup required."

---

## 🖥️ [Live Demo - 0:55–1:50]

**Visual:** Screen recording of you using the app, narrated walkthrough

**Voiceover** (speak as you click):

"Let's show you how it works.

First, the user logs in and sees their dashboard.

They can [Feature 1] with just one click.

Behind the scenes, we [mention backend magic – e.g., API call, model, DB].

If we go to [Feature 2], we see [explain benefit/result].

It's fast, intuitive, and works end-to-end."

✓ Keep this section crisp. Show 2–3 core features max.

✓ Narrate the **value**, not just what's on screen.

---

## 🔧 [Tech Stack + Challenge - 1:50–2:10]

**Visual:** Architecture diagram, VS Code clips, terminal output, GitHub link

**Voiceover:**

"We built this using [**tech stack**].

We integrated [e.g., **OpenAI, Stripe, Firebase**], and solved a tough problem around [e.g., **data parsing, auth, latency**].

All in under [X] hours."

---

# Alfonso Govela

## [Impact & Future Vision - 2:10–2:30]

**Visual:** Bold text, icons, or faces of users

**Voiceover:**

"[**Project Name**] can help [user group] save [time/money/effort].

We've already imagined how this could grow — with features like [idea], or partnerships with [platform/org].

The possibilities are real."

---

## [Outro - 2:30–2:45]

**Visual:** Team waving, app logo, thank-you screen

**Voiceover:**

"We're Team [Name], and that was [**Project Name**].

Thanks for watching — and we hope you enjoyed the demo as much as we enjoyed building it."

---

## Tips for Filming:

- Use **Loom**, **OBS**, or **Screen Studio** for screen capture
  - Record clear **audio narration**, or use subtitles if preferred
  - Keep energy high and visuals focused — **cut dead air**
  - Optional: add background music (light, instrumental)
- 

Would you like me to tailor this for your actual project, or generate a sample storyboard with visuals?
